

NP 02 Neckband Headphones for Visitor Guidance and Conference Systems

FEATURES

Lightweight on-ear headphones with neckband to accommodate additional headgear.

- Ergonomic neckband for superior comfort and perfect fit
- Excellent speech intelligibility
- On-ear design for good acoustic quality
- Easily changeable ear pads for comfort and hygiene
- Single-sided cable

The new **NP 02** features an ergonomic neckband for superior comfort that can also be worn with additional headgear, for example helmets. It reproduces outstanding speech intelligibility and delivers a very good overall sound quality.

The single-sided cable makes handling easy and the changeable ear pads ensure a long service life.

ARCHITECT'S SPECIFICATIONS

The lightweight on-ear neckband headphones shall be designed for use with visitor guidance and conference systems. The headphones shall deliver natural sound reproduction and optimized speech intelligibility. An ergonomic neckband shall be provided that accommodates additional headgear (e.g. helmets). The ear pads shall be easily changeable to meet stringent hygiene standards. The cable shall be single-sided. The frequency response shall range from 20–20,000 Hz, impedance shall be 32 Ohm.

The neckband headphones shall be available in two versions: -100 and -140. The -100 version shall have a cable length of 100 cm (39.37"), a straight 3.5 mm stereo plug and a weight of 52 g (2.47 oz).

The -140 version shall have a cable length of 140 cm (55.12"), a right-angled 3.5 mm stereo plug and a weight of 54 g (2.54 oz). The neckband headphones shall be the Sennheiser NP 02.
