

MRX-10 | ADVANCED SYSTEM CONTROLLER

Advanced Network System Controller

OVERVIEW

Powerful MRX-10 network controller is the primary processor for the Total Control system. This high-performance processor works with the family of best-in-class user interfaces – handheld remotes, touchscreen controllers, keypads and mobile apps – to deliver highly-responsive whole-home automation and control.

- Primary processor for IP, IR, RS-232, sensor and relay
- Provides two-way control of Total Control and compatible third-party products
- Stores and issues complex automation and control commands - up to 32 rooms
- Supports voice control integration with Amazon Alexa and Google Assistant
- Signature Total Control front panel with adjustable LED lighting, rack mountable
